Scripting and markup languages: HTML, XML, JavaScript, AJAX, JQuery
Database technologies: SQL Server (T-SQL), DB2, LINQ to SQL, Entity Framework

Experience

Ohio Public Employees Retirement System

Columbus, Ohio 43215

Solution Architect

June 2011 to Present

At OPERS I lead a small, high-performing team of developers who's responsible for the design and development of an ASP.NET MVC 3 web application. The application is part of a large organizational business process redesign and full software architecture redesign. It's used by both internal and external users, and acts as the user interface to all our business rules and services exposed through Java services.

- Selected by senior management to serve on our SOA Center of Excellence (COE).
- Orchestrated the integration of various web services including third-party applications, .NET, Java, and CICS, to provide users with a unified, responsive, and friendly interface.
- Responsible for quickly and efficiently bringing new developers up to speed on a fast paced, high-stakes project.
- Coordinated work between the various teams to ensure smooth development cycles.
- Established new coding standards, patterns, and cookbooks, for a large team of developers of various backgrounds and experience levels.

Senior Programmer/Analyst

September 2002 to December 2011

Prior to my role as Solution Architect, I was a Senior Developer responsible for the design, development, and implementation of multiple applications supporting major organizational initiatives. I established myself as a leader, and quickly became considered a "go-to" person amongst my co-workers.

- Designed, developed, and implemented a customer relationship management solution that increased productivity and accountability in the organization through increased knowledge and end user empowerment.
- Established and enforced team coding standards and change management procedures to ensure the highest quality product.
- Designed, and supervised development and implementation of an electronic document routing engine that lowered response time by streamlining business processes.
- Designed and implemented a suite of Windows Communication Foundation (WCF) web services for integration with our enterprise work flow and imaging solution.
- Responsible for the training and mentoring of all new team employees, as well as their continued growth.
- Acted as the technical lead on numerous projects of varying complexity.

Core Skills: ASP.NET (VB and C#), MVC, Razor, HTML, XML, JavaScript, AJAX, JQuery, SQL, SQL Server, DB2, Service Oriented Architecture and Design, Data Modeling, Systems Design and Analysis, Object Oriented Design

Education

DeVry University
Columbus, Ohio 43209
Bachelors of Science in Computer Information Systems
GPA : 3.75 / 4.00
